Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

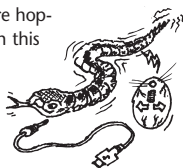

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Digital Scientists

Billions and billions of people love Carl Sagan, and Nikola Tesla is AS&S's all-time favorite scientist, which is why so many of us have these guys on our index fingers for company. Now you can stick either or both of them on your fingers, too. Re-create Sagan's lectures for your friends and students, or use Tesla to explain alternating current to anyone who's interested in that kind of thing. When you get tired of them, stick them on the fridge. Each has a magnet in his head, right where his big brain would have been. **⚠WARNING: CHOKING HAZARD-Small Parts. Who's The Dummy On Your Finger?

Our set of (4) rubber finger puppets are made to look like ventriloquist dummies, complete with little lines that mimic movable mouths. They also give the puppets a vaguely zombie-ish look but that's a good thing, we think. Measure 2-1/2" tall x finger-sized. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

94987 Dummy Puppets **\$6.95/each**

Doodle In 3-D

Think of it as a shortcut to learning perspective. This clever 50-sheet pad of white, 7" x 4-1/2" paper has a fine red and blue grid pattern that shows your drawing and doodling in 3-D when you wear the included 3-D glasses. It's our candidate for the why-didn't-I-think-of-that award this year.

Sale Price! \$5.95/each

Pick Your Lizard

You want to touch these life-size, beautifully detailed, 3 lb lizards, don't you? The Jumbo Monitor Lizard, found in Africa, Asia and Australia, is now available here. He has cream-to-brown coloring and a flexible forked tongue, and is 41" long when his tail is uncurled. The Green Iguana, 3 ft long from nose to tail, takes only 2 ft of branch (or shelf) space, since his tail also has a natural looking curl. We've seen these guys being sold for food in Central America, and you couldn't tell this one from the real thing--except that theirs are Blue Iguanas. Being concerned about the environment, we always prefer green.

These Are Tops In Our Book

These are not only tops in our book, but there are a dozen of them. Plastic tops, approx 3" dia, with assorted diffraction grating patterns on top. Alien Ping-Pong Ball

This sinister device seems at first glance to be an innocent ping-pong ball. Touch both of the metal strips on the weighted bottom, however, and a circuit closes, making the ball flash red and moan eerie electronic sounds. Can be used to illustrate the idea of an electric circuit to children—show how electricity can flow through a chain of people holding hands, or that a little dampness can improve conductivity, et cetera. Powered with two watch batteries (included) so there is no danger of shock. **⚠WARNING:** CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

Drawing A Blank?

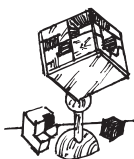

The draw-it-yourself jigsaw puzzle, just begging to have an invitation written on it, and then be mailed to potential guests as a handful of pieces. But this 28-piece cardboard puzzle also measures a desktop or car-friendly 6-3/4" x 4-3/4" in plain white, so it's also begging to have kids add a picture for the fun of it. It's even suggesting that you mix the 336 blank pieces in a pile, explain it's a dozen pictures of an albino moose in a snowstorm puzzle, which it might very well be for all we know, and award a prize for the first finished puzzle. Note the classroom and party-friendly bulk price. **⚠WARNING:** CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

No, the 8-piece isn't any easier and yes, there is an answer key but it's nearly as hard to figure out as the puzzle. **⚠WARNING:** CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

I Dive...

therefore I am. Rene Descartes didn't limit his thinking to, well, just thinking. He also created the Cartesian diver. Our version is science crossed with a fun little game of skill. You supply a plastic 1-liter bottle, we supply the plastic pipettes, wires, brass nuts and instructions, which, if you follow them carefully, will have you sending a diver to the bottom of the bottle trying to hook a sinker. No wagering, please.

89236 Underwater Hook **\$3.95/each**
Sale Price! **\$2.00/each**

Lemme Play! It's My Bat!

When it's your bat, they have to let you play. Better bring the gyroscopic Batwing Flyer™. This 2-3/8" dia rubber ball has a spinning gyro center and 9-1/2" long molded rubber bat wings. Practice with it a little (it's a bit like throwing a slider) and you can throw it like a ball and watch it fly like a bat. Complete with little bat eyeballs.

"I've Got A Big Pair"

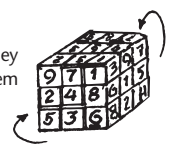

Deuces, but they're 5-1/4" tall x 3-1/4" wide. For folks with really big paws, or really bad eyes, these oversized playing cards, the standard (52) plus a pair of giant jokers, is the answer to a prayer - and nice decorations for a Las Vegas night, to boot.

36772 Jumbo Size Cards **\$3.95/pkg(2)**
Sale Price! **\$3.50/pkg(2)**

H20Sudoku

These Sudoku cubes are just fine except they got maybe a little wet, which isn't a problem because they're plastic but some of the numbers may be loose or have fallen off into the package, so you need to stick them back on, but at these prices that's a small price to pay, don't you think? So do we. Take off all the numbers and they're much easier to solve, and to turn into other DIY projects. You get (3) 2-3/16" cubes.

11825 Wet Sudoku **\$2.95/pkg(3)**
Sale Price! **\$2.50/pkg(3)**

Puzzling Croc

Build your own crocodile from this 8-panel, 183-piece puzzle kit. When assembled, the 3-dimensional croc is approx 30" long x 9-1/2" tall x 5-1/8" wide, and is movable at the joints. Makes a lovely centerpiece for the dining room table for your next jungle party. Made for ages 8 and up. **⚠WARNING:** CHOKING HAZARD—Small Parts. Not for children under 3 yrs.

Aluminoes

Our slickest, and smallest, domino set ever. You get (28) brushed aluminum dominoes, 1-1/4" x 9/16" x 1/16" in a velvet-lined aluminum case. If James Bond had played dominoes, this is what he would have carried. The case is not exactly pocket-sized but it's small enough to stuff into a bag as easily as you'd stuff a book.

42823 Aluminum Dominoes **7.50/each**

Insectectomy On A Gecko

Operate on what could be a lizard, or what could be a gecko. In either case, it's like the old Operation game, except you use tweezers to remove plastic bugs from a cute reptile's stomach. A Ring Of Pirates

You can't be a pirate without an official flashing pirate ring. This cast-zinc ring has a bearded pirate head with a skull & crossbones hat. Turn the head and watch the mouth and un-patched eye flash yellow. The inside diameter is 11/16" which makes it a size 7, so we're talking kids, lady pirates or a pirate pinkie ring. (Yes, a pirate who is secure in his masculinity would too wear a pinkie ring.) Why so cheap for pirate booty like this? Because the (2) AG7 replaceable button cell batteries it comes with might or might not be bad. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Give Someone The Bird

It's the Gold-Beaked Kooshy Penbird. The Penbird is 8-1/2" tall and looks like a one-legged cross between the roadrunner and Jar Jar Binks, with kooshy-ball feathers. Wow! Double Wow!

This is Philip's new favorite toy, since he blasted a rocket so high over our parking lot that he lost sight of it (the rocket, not the parking lot). The Air Burst™ Rocket system has a 26" tall, air-powered tri-pod launcher made of plastic and rigid foam. A 65" long air hose connects it to any stand-up bike pump. After a few pumps, the air pressure bursts a replaceable booster disc in the launcher and sends a 10" x 3/4" dia rocket 250 to 1000 feet into the air. Wow! The system includes the launcher, (2) rockets, and (60) boosters (two different weights). Sending rockets out of sight, even if they usually come straight back down, is an ingenious ploy for selling extra rockets. Our each is a pack of (2). And having extra rockets is an ingenious ploy for selling extra booster discs. Our each is another bag of (60). Warning: The Air Burst™ Rocket is for ages 10 and up, with adult supervision. It could have been called an Alabama Buzzer after Alabama Vest, the man who invented it. Or a Clegghorn, after Thaddeus Von Clegg, the clock master who fabricated the first one. Bone Up On Anatomy

You're not going to blow money on an actual human skeleton, are you? Consider that for a tenth of the price you can get an anatomically accurate skeleton done in plastic. This model is male (judging by the hips) and has many articulated joints—jaw, shoulder, knee, etc. Its small size (33") makes it practical for classroom use, since it can be passed around the room. Other nice touches include discrete neck vertebrae, a sectioned skull, and very little "flash" from the plastic molds. It also comes with a metal display stand, weighted at the bottom to prevent spills. Yes, some concessions had to be made because of the size and price, but this is still an invaluable teaching tool, and quite a nice decoration for those with morbid minds.

Fantastic Ant Farm

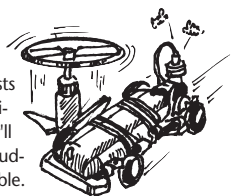

Ant farming has been reborn since NASA got interested in insectaries and Fascinations® started manufacturing AntWorks™. What used to be a dark, earthen ant farm is now a curvilinear plastic habitat containing gel the color of a Caribbean dive site. The clear turquoise gel is the food, water and housing medium of the insects, which you may capture locally, or order via mail. We ordered ours, the better to avoid militant army or fire ants or feuding factions, and it worked out just fine. The ants dig relentlessly for weeks, and you can easily observe them constructing and connecting a maze of tunnels. It's utterly fascinating. The 6" x 5-1/2" x 1-1/4" thick space-age habitat comes with an educational booklet, simple instructions (there's practically nothing to do), the address of the ant dealer - and a tight lid.

Make Mini Mayhem

A must-have for micro-warriors; Mini Weapons of Mass Destruction by John Austin (author of the best-selling Cubicle Warfare) is 241 pages of detailed instructions for building (42) implements of spitball warfare from ordinary household objects and office supplies. With the caveat that this is written for responsible individuals who take reasonable safety precautions (don't do anything your mother would scream at) we have to say that we love the binder-clip crossbow and the tongue-depressor catapult. Volume 2, which is 251 pages, has a secret-agent flair with new gadgets like the push-pin dart, tooth-paste periscope and cereal briefcase. Volume 3, 267 pages, continues with a Medieval flavor and over a dozen catapults and ballistae, plus a buncha bows and crossbows. Oh, just buy the whole 3-volume Library of Destruction and get it over with.

Leather Leftovers

What's left of a Kansas City cow after all the steaks are gone? Lots of leather! (Think buckskin, not biker jacket.) You choose from: 1) The one-piece Lace Leather Belly. Really more of a long half-belly, this solid piece of leather is between 2-1/2 and 3-1/2 sq feet. Ours was approx 10-1/2" wide x 45" long x 1/8" thick. 2) A pack of Leather Strips. Ours was a very assorted 2 lbs of strips and larger pieces of leather, 1/16" to 1/8" thick, in rust and brown. 3) The Farmer Bundle Repair Bag, 2 lbs of scraps in various colors. Ours contained a solid 12" x 8" piece and a very large bundle of brown leather thongs 47" long x approx 1/8" square. Lots of variety, and lots of heavy leather for the price.

Patches and Badges

Frankly, we don't need no patches or badges, stinkin' or otherwise. But you do. Because you have patch-mad progeny. Someday they'll get over it, but meanwhile, here are a whole big bunch of staggeringly inexpensive iron-on and self-adhesive embroidered fabric badges and patches. These small ones are for small-frys, but are an excellent quality and very workable for scrapbooking moms. All about 1" or 2", they feature tiny houses, cars, cows, clouds, stars, that sort of thing. Very, very assorted. **WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Scary Molds

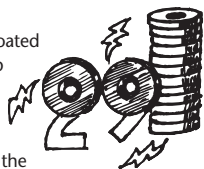

These white porcelain molds from the balloon industry are, frankly, the scariest medical-looking non-medical items we've seen in a long time. They come in all sorts of sizes, mostly from 5" to 10" long, and a bunch of shapes: rounds, ovals, screws, rods, storks, mouse heads, all on shafts with a threaded end to screw into the balloon machine. They're a surrealist's dream, the answer to an avant-garde sculptor's prayers, and great items to leave in your medicine cabinet for nosy guests to find. Sorry we can't fill requests for particular shapes. It's all we can do to pick out (3) different ones for your package of (5), so try not to make Kathleen feel bad by begging for mouse ears. Thank you.

A Lot Of Pull

Pick up this 1-3/4" x 7/8" x 3/8" ceramic pick-up magnet while we still have it. It's in a heavy metal housing and has a stationary metal hoop, about 1/2" i.d., on top. The manufacturer tells us the magnet will grab up to 30 lbs of metal, and while Pat wouldn't bet on anything over 20 lbs, it's still very strong. Especially if you're going to dangle it on the end of a cord to gather spilled nails or to fish your keys out of the lake/pond/sewer/drain!

Stick-To-It Sheets

Our magnetic sheets aren't large enough to make a magnetic bed, but they're just right for making a bulletin board, hanging on to a rounded surface, or clinging to a car door with their glossy magnetic side while their self-adhesive side holds your removable sign. They're a flexible, very dark brown rubber-like material, easily cut with scissors. The large sheets, a 2-ft piece is cut from the 2-ft wide material, and you pick a light (.011" thick) non-adhesive, a medium (.018") self-adhesive, or a slightly thicker (.021") self-adhesive sheet.

Voted most likely to attract by the judges, this magnet has the relative strength of 10 men. A shiny silver 1/2" cube of neodymium magnetism, it packs approx a 15-lb pull. Dandiest Donut in the Domain

Donut magnet you can take to town!! 74mm dia x 14mm thick with a 30mm hole. Very strong and well pedigreed - in fact, its kin are activating pacemakers. They are of a high permeability ferrite material with a lovely light blue or white epoxy coating. Okay, we have them because there is the odd bubble, slight scratches or the word MAGNET painted in the coating which ruled them out of the medical ball, but they're fine company nonetheless. Good display bases, paper clip traps, and super for classroom demos.

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eye-hook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

Killer Magnet

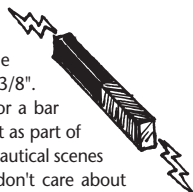

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 1/2" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

Holiday Magnet

This holiday-appropriate bar magnet is painted red and green to mark the poles. Measures 3-7/8" x 5/8" x 3/8". Approx a 4-lb pull (which is strong for a bar magnet), and when you're not using it as part of a Christmas motif, it will also work in nautical scenes and anything Italian-themed. If you don't care about colors, it's just a really solid bar magnet.

Disposa-pouch

A pharmaceutical company gave these handy buggers away at one time, but they didn't put their name on them! (Someone probably got fired.) You get (5) Tyvek-ish pouches with a clear front so you can slide a piece of paper in there with a logo or message on it, or something more substantial, like a small water bottle. Pouch measures 8-3/8" x 4-5/8" and connects to a not-so-disposable white nylon adjustable strap/belt, 15/16" wide x 65" long with a white plastic snap buckle. The straps alone are worth twice the price.

The Straight Skinny Cases

These black nylon, zippered and padded cases were made for Johnson levels (and are so logoed) but we use them for toting salamis to the office, or transporting our broom handle collection. The shorter one measures 26-3/8" long x 5" and could be used for a two-piece pool cue, knives (if you're a free-lance chef), a clarinet or flute, or the straight skinny if you find it. The longer one, 72" long x 5-3/8" with an 18" zipper at one end, won't fit in the overhead but could be used to carry a hiking stick, stuffed snake, pair of matched fungo bats, an extreme kielbasa, a one-piece pool cue or a two-piece that you don't feel like taking apart. Both have canvas handles in the mid-section, for carrying.

De-Strapped Leather Case

Made for a camera, this black leather case is pretty near universal. Measures 7-1/2" wide x 6" x 4" with a fold-over top that has a small pouch and a snap closure. Opens to (2) inside pouches, (1) large & padded (camera-sized) and one wallet-like with a zippered compartment and (6) card slots. Has a belt loop on the back, and tabs for a shoulder strap on the side. The shoulder strap is missing (surplus!) but easy to add for resourceful folks like you.

Almost Free Flight Bag

Back in the Wright Brothers' day airlines used to give you these free flight bags when you flew first class--and this was during a time when first class airfare didn't cost the same as a mid-sized car. These bags look just like those except they're blessedly logo-free. Measure 14" x 11" x 5" in a tasteful light gray nylon with an adjustable 1" wide strap, a side pocket and a zippered top--and they're practically free, especially when you think about the cost of first class air travel or a new car.

Hey, Jute...

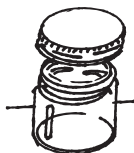

Time ago, burlap bags're all over the place, child. We used 'em to make sandbags, protect winterin' plants and keep down weeds, sew up scratchy britches, and collect frogs. Made dog beds out of 'em, fulla wood chips. Mama called 'em tote sacks or croker sacks, and daddy aluss kep' a few in the bed of the pick-up. 'Course daddy went and died and them plastic bags took over. Mama hated that. These here burlap bags used to have coffee inside and they say they're from lotta different countries and your'n might could be anywhere from about (3) to (4) foot long by 28" wide, good fer big dogs or small dogs-lotta frogs either way.

Peculiar Injection Vials

We've never seen anything quite like these little clear glass vials, which means they must have myriad uses, particularly at this price. The large one is 1-3/4" tall x 15/16" dia with a shoulder and a 1/2" ID lipped mouth on the top, leading into a 1" deep conical cavity. The bottom has a 5/8" mouth, with an internal lip, and opens into a cavity around the little conical reservoir. So you can fill either end. Which would hold maybe a couple of ccs one way, or 1/4 oz the other way. The little one is the same, but is 1-9/16" tall x 5/8" dia and a 1/4" ID mouth on top, 7/16" on the bottom. We're thinking obscure lab experiments, or chimneys for streetlamps in model railroads. Or something.

These perfect little clear-plastic canisters have snug pull-off tops. Or toss the foam and store small amounts of anything that doesn't need a screw top. You pick (50) small canisters at 1-1/4" dia x 11/16" deep, or (12) larger canisters at 1-3/4" dia x 5/8" deep.

Little bowls like these are called monkey dishes in the restaurant business. Doesn't pay to ask why, we think, but they're extremely handy. These are stainless steel, 4-1/2" dia x 1-1/2" deep. They're marked "Pet Bowl," but wouldn't work for anything over kitten size. We'd use 'em for peas, paints, pickles, peanuts, paste, prune pits, like that. Disposabowls

Select-a-shape lightweight, disposable, cream-colored LDPE bowls! The 16-oz bowls with tight-fitting disposable lids are 2-3/8" deep and a bit over 5" dia at the top. Look like lidded cereal bowls and were, we think, intended to be used on deli trays, but we won't make a food-safe claim. We'll suggest that they make nice paint pots and craft containers, and are cheap enough to either recycle or toss out when you're done. The shallow LDPE bowls are 1-3/8" deep, also a bit over 5" dia at the top, hold 8 oz, and are also a good shape for holding paint or bits and pieces during art class. Buy both sizes, since the lids from the deep bowls also fit the shallow ones! Serendipity? We consider it clever planning.

SURPRISE!

Mystery boxes of stuff like what you see in the catalog. Maybe we had a little left but not enough to continue the listing. Maybe we only got a few as part of an odd lot. Maybe we lost some, and just found them in the warehouse. You will get items which originally listed for at least \$25.00 total in our catalog (or would have, if we had enough). You pick. The "electro-mechanical" box has things like motors, switches, hardware and components that are useful parts but want to be worked into something bigger. The "consumer" box has more ready-to-go type items, and things that don't have as technical a flavor, like bottles, toys, books, and giant rubber bands. The fun is in the mystery and surprise. Perfect if you don't know what to give Aunt Maude and Uncle Ned, or if you can't decide how to bring your order up to the minimum. Every couple of months the contents will keep changing, so even if you have gotten a box before, feel free to order again!!

Insecticidal Solar Accent Light

Looks like a mini version of an old street lamp, but it's solar powered with rechargeable batteries, and it makes a lovely accent light in the garden. Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" We've seen these in other catalogs for about twice the price, so buy it from us. Just be careful with it. (2) AA batteries, not included.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Lookers!

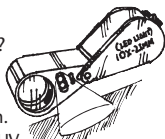

The kids need presents for all the grandmas and great-aunts? You volunteer at the nursing home and need token gifts for your L-O-Ls? And your eyes aren't so good, either? Our each is really half a dozen pretty little magnifiers with round lenses and fancy handles. The handles are silver-bright (hard to believe they're aluminum) and all different. Each has a discreet hole in the tip for a jump ring so it could be worn on a necklace - but it would look just as pretty on a desk. The overall length of the (6) magnifiers varies from about 3-3/4" to 5", the lenses from 1-1/4" to 1-3/4" dia. All are approx 2X magnification. Mary Ann's pick of the month.

See It Again, Sam

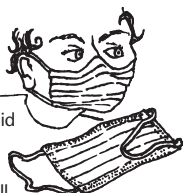

A Sherlock Holmes-type magnifying glass is good, but this is better. It frees your hands and throws light on the subject! This 120-volt magnifying desk lamp has a heavy 7-3/8" x 5-1/2" x 2" base with a power switch, standard lamp cord, and 11" gooseneck ending in a 5-1/4" dia shade. Under the shade is a circular fluorescent bulb and a 3-3/8" dia lens with a flip-back cover. The box says the lens is 5X, we think it's closer to 2X. Either way, it's a major improvement if you need help to examine scientific specimens, to inspect stamps or jewelry, or just to read. And we won't even talk about how your nail care is going to improve after you see your cuticles under this thing!

Stethos is Greek for chest. Indeed you can scope your stethos with this stethoscope, or your friend's or your dog's. But it works equally well for picking up any sound being transmitted through a solid medium. Listen to the air flowing through the heating ducts, the water in the pipes, the sounds of machinery, the termites munching on the floor joists!! The color does vary so we will select from what's currently available. We've had blue, teal, red, black, burgundy, green and purple, but there may be other colors yet to be seen! Fallout Shelter Sign

They're Back! Those of a certain age will remember being taught to crouch under their school desks in case of nuclear attack. Shortly thereafter, the gov't, in its infinite wisdom zoomed about the cityscape plastering black and yellow signs on buildings with basements to designate them as fallout shelters wherein it stored cans of water and radiation meters which were so insensitive that any reading could only mean the past tense of crispiness. We have a quantity of these signs, brand new in the sense that they have never been plastered, but antique in the sense that they are the Fifties originals. 10" x 14", 25 ga. galvanized steel. Peltier Heat Pump

High tech comes to Am Sci & Surp!! It is here in the form of a Peltier junction, a thermo-electric device that translates electric power into heat, and conversely, into cool. Apply current @ 3-12 VDC to the gizmo and it extracts thermal energy from one face, thereby cooling it. The heat is dumped onto the other face, thereby heating it. Please note: you must use a heat sink on the hot side or the junction will fry itself, since it can quickly create a 65° C temperature differential in a no load situation. Stack two, or build a cascade to increase the thermal differential created. Or run it backwards. Apply heat or cold to the relevant face and produce a current. Amazing for science projects and experiments. Practical for coffee warmers, beer coolers and mini-refrigerator or warming oven applications. Comes with instructions. Large is 1-9/16" sq. x 3/16" thick.

The Penny Cutters

These are the so-called miracle shears from Pakistan. They were designed for use by paramedics and others needing quickly to cut wire, light sheet metal, or other tough stuff that might stand between them and their quarry. They are normally demonstrated cutting a penny in two. Which they will do. But not as a steady diet. Let's dispel a few myths. While these are Pakistani stainless, we're not talking any miracles in manufacturing. They are good for their purpose, and real handy to have in the old tool box. But their purpose isn't making pennies into 5-mil pieces, and you will twist or break them at about the same time you find out that you've done the same thing to U.S. laws! For sheet metal or wire or fishing leaders or tin cans or whatever, be our guests.

They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.

Riffer files are most prized by sculptors, wood carvers, model makers and similar fashioners of precision objects. They come in a variety of flat, round and triangular shapes. They are usually pointed and always have a delicate curve toward the point which makes them particularly useful for working in tight and curvy spots. We have a set of (10) in an attractive red plastic case. They are 3 x 180 mm size (about 7"), and were made in China for the King Manufacturing Co. Very nice quality at a very nice price. They can cost as much as \$4.00-\$5.00 apiece in regular outlets.

We Saw A File To File A Saw

Sharpen your teeth. On your saw, silly, unless you're a vampire--although you isn't these days? Our saw-file measures 8-3/4" long with a 4-1/2" long triangular file with sides made for sharpening saw teeth. CJ, our Associate VP for sharpening stuff, says "Ignore the label, use a little chalk before filing and keep a wire brush handy for after." Good advice generally, we think.
